This inspiring book features 25 touching, hilarious, eye-opening, and true tales about the most frustrating, intimidating, underpaid, and wonderful job in the world. In schools across America, in classes for handicapped, gifted, privileged, and disadvantaged students, these teachers recall that exciting first year, when they were often given the toughest kids and the biggest responsibilities of their careers. From coping with inner-city diversity to challenging poor self-esteem, these extraordinary images come straight from people who have already taken those first courageous steps of the novice educator. For anyone who is contemplating teaching as a profession, this invaluable collection is a must-read. "Vivid, poignant, and often funny stories about one of the most challenging experiences anyone can have: first-year teaching."—Albert Shanker, President, American Federation of Teachers Connecticut boasts some of the oldest and most distinctive architecture in New England, from Colonial churches and Modernist houses to refurbished nineteenth-century factories. The state's history includes landscapes of small farmsteads, country churches, urban streets, tobacco sheds, quiet maritime villages, and town greens, as well as more recent suburbs and corporate headquarters. In his guide to this rich and diverse architectural heritage, Christopher Wigren introduces readers to 100 places across the state. Written for travelers and residents alike, the book features buildings visible from the road. Featuring more than 200 illustrations, the book is organized thematically. Sections include concise entries that treat notable buildings, neighborhoods, and communities, emphasizing the importance of the built environment and its impact on our sense of place. The text highlights key architectural features and trends and relates buildings to the local and regional histories they represent. There are suggestions for further reading and a helpful glossary of architectural terms A project of the Connecticut Trust for Historic Preservation, the book reflects more than 30 years of fieldwork and research in statewide architectural survey and National Register of Historic Places programs. Fresh examinations of the manuscript which is one of the chief compendiums of literature in the Middle English period. Design and Operation of heat

Exchangers and Their Networks presents a comprehensive and detailed analysis on the thermal design methods for the most common types of heat exchangers, with a focus on their networks, simulation procedures for their operations, and measurement of their thermal performances. The book addresses the fundamental theories and principles of heat transfer performance of heat exchangers and their applications and then applies them to the use of modern computing technology. Topics discussed include cell methods for condensers and evaporators, dispersion models for heat exchangers, experimental methods for the evaluation of heat exchanger performance, and thermal calculation algorithms for multi-stream heat exchangers and heat exchanger networks. Includes MATLAB codes to illustrate how the technologies and methods discussed can be easily applied and developed. Analyses a range of different models, applications, and case studies in order to reveal more advanced solutions for industrial applications. Maintains a strong focus on the fundamental theories and principles of the heat transfer performance of heat exchangers and their applications for complex flow arrangement. ***Includes Practice Test Questions***

Haikus today is an elegant and inspiring collection of Japanese Haiku poems by Sylvia McCabe. Based on her extensive travels around the world and life experiences, they transport the reader to many different experiences, observations, and locations. Sylvia also encourages the reader to create their own Haikus with creative space throughout the book. From the introductory.

The nucleus of the following disquisition is the material collected during many years for the chapter on Negatives in vol. III or IV of my Modern English Grammar (abbreviated MEG), of which the first two volumes appeared in 1909 and 1914 respectively (Winter, Heidelberg). But as the war has prevented me (provisionally, I hope) from printing the continuation of my book, I have thought fit to enlarge the scope of this paper by including remarks on other languages so as to deal with the question of Negation in general as expressed in language. Though I am painfully conscious of the inadequacy of my studies, it is my hope that the following pages may be of some interest to the student of linguistic history, and that even a few of my paragraphs may be of some use to the logician. My work in some respects continues what Delbrück has written on negation in Indo-European languages (Vergl. Syntax 2. 519 ff.), but while he was more interested in tracing things back to the "ursprache", I have taken more interest in recent developments and in questions of general psychology and logic....

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea. A descriptive grammar of Yoruba, a major West African language spoken by over twelve million people, first published in 1966. "Integrate Math III is the final course in the three-course Integrated Math series. With this course,

students further explore quadratic functions and extend learning to polynomial functions. Students extend their understanding of arithmetic and geometric sequences to series, and their knowledge of trigonometric ratios to trigonometric functions. Additionally, students explore distributions of data, confidence intervals, and statistical significance." -- publisher Offering students and practising teachers a detailed guide to teaching children at Key Stage 2, this book shows what skills are needed, and describes ways in which these skills can be developed. Over 70 practical tasks are included, with guidance on how teaching and learning can be assessed, and there is coverage of National Curriculum Attainment Targets in the core subjects at Key Stage 2. Teachers show up in different forms and in many chapters of a child's life. Teaching is literacy and numeracy but, most importantly, it's showing up with your whole heart. It's walking kids-and yourself-through the hardest conversations about trauma, loss, grief, racism, or violence. As we work to piece together our education system in the fallout from global pandemic, the focus must be on the teachers. If the people in charge-those teachers-aren't OK, the students don't stand a chance. Dr. Jody Carrington and Laurie McIntosh bring together theory and practice, weaving the science of human development with real-life stories and tangible strategies told by those most qualified to share them-our teachers. This book is for those who need a place to land when they want to be reminded that, simply by the choice of their profession, they are a powerful force in shaping our world. "Teachers These Days is filled with heartfelt happies and heartbreaking hurts. I connect with the theory-into-practice way that it is set up, and I appreciated the voices of the others in their raw, poignant stories." -Barbara Gruener, teacher and school counselor "Teachers These Days honors the work and experience of educators while providing a familiar context to all teachers. The section on grief is captivating and visceral and beautiful." -Meaghan Reist and Shelley Smith, vice principals and creators of Culture Curators
