In Search of Greener Grass Oct 13 2021 From backpack to bicycle and now on a motorcycle, but still on a budget, the author, a compulsive traveller, embarks on a journey East from England with Mongolian intentions. In possession of a good sense of direction, a vague sense of balance and no sense of proportion; this particular trip is financed by modest winnings from an uncharacteristic appearance on a TV game show. Riding a bargain eBay purchase Kawasaki KLR 650 and travelling solo into places beyond the guide book. A daily diary of achievements and mistakes incurred in a transient lifestyle, with mixed emotions from overawed to just plain bored, and making the best of decisions made while trying not to reflect on the alternatives. This is a refreshingly honest, thought provoking, humorous and informative account based on a lifetime of first hand encounters, anecdotes, wisdom and occasional alcohol induced inspiration. Offering an unavoidable wealth of experience which takes the reader with him, as the journey twists and turns on the road which the author hopes will lead him to greener grass.

Semi-Trucks of the 1950s Jan 16 2022 After WWII Americans were anxious to re-stoke the economy after a long "make-do with what you have" dry spell. By the 1950s new highways were being built, new trucking companies were being formed and old ones revived. Americans were buying newly-styled cars and the latest technologies once again. Semi-trucks helped pave the way for this huge growth spurt in America with dependable trucks built by Mack, GMC, Chevrolet, Ford, Dodge, International, White Freightliner, Peterbilt, Kenworth, Diamond T, Reo, Autocar, Brockway, Sterling and others, many using the increasingly popular diesel engines made by Buda, Hercules, Waukesha, and Cummins, which helped their heavy loads haul quicker. Ron Adams portrays this booming era with over 300 superb photos of trucks hauling cement, fuel, and a variety of goods to enthusiastic Americans.

Muncie 4-Speed Transmissions May 20 2022 The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.
