The Aubin Academy Master Series: AutoCAD MEP, 2012, 2013 and beyond Sep 05 2020 The Aubin Academy Master Series: AutoCAD MEP is a concise manual focused squarely on the rationale and practicality of the AutoCAD MEP process. The book emphasizes the process of creating projects in MEP rather than a series of independent commands and tools. The goal of each lesson is to help the reader complete their projects successfully. Tools are introduced together in a focused process with a strong emphasis on "why" as well as "how." The text and exercises seek to give the reader a clear sense of the value of the tools, and a clear indication of each tool's potential. The Aubin Academy Master Series: AutoCAD MEP is a resource designed to shorten your learning curve, raise your comfort level, and, most importantly, give you real-life tested practical advice on the usage of the software to create mechanical, electrical, and plumbing designs, and calculations. Empowered with the information within this book, the reader will have insight into how to use AutoCAD MEP to create construction documents that are reflective of their standards and expectations.***This edition is designed takes the core version 2012 text and makes it compatible with version 2013 by providing a 2013 format dataset download and noting differences where they occur. This book is fully compatible with version 2012, 2013 and beyond. Visit paulaubin.com for free downloads and PDF chapters***

Big Data Analytics and Knowledge Discovery Sep 17 2021 This book constitutes the refereed proceedings of the 17th International Conference on Data Warehousing and Knowledge Discovery, DaWaK 2015, held in Valencia, Spain, September 2015. The 31 revised full papers presented were carefully reviewed and selected from 90 submissions. The papers are organized in topical sections similarity measure and clustering; data mining; social computing; heterogeneous networks and data; data warehouses; stream processing; applications of big data analysis; and big data.

Destination Collaboration 1 Dec 21 2021 This comprehensive guide empowers library media specialists to achieve full instructional collaboration, providing curriculum-coordinated lesson plans for grades 3–5, teaching content while fully integrating information literacy and technology skills. * Provides over 80 individualized, student-approved print activities and documents, such as "Green Agenda" and "Archiving Benjamin Franklin" * Incorporates project-based learning into each lesson unit and offers suggestions for integrating technology, modifications for above or below grade level students, and recommendations for read-alouds and extension options * Contains sidebars with discussion opportunities as well as classroom connections to each unit of instruction * Includes bibliographies in resource lists as well as at the end of each chapter

Ditch That Textbook May 14 2021 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Building Online Communities with Drupal, phpBB, and WordPress Oct 19 2021 * Content management, blogging, and online forums are among the most significant online trends today, and Drupal, phpBB, and WordPress are three of the most popular open source applications facilitating these tasks. * The authors have played active roles in project development and community support (Mike Little is actually a Wordpress project co-founder). * Drupal, phpBB, and WordPress are based on the PHP language and MySQL database server, ensuring the widest possible audience.

Creating Policies for Results Mar 12 2021 What does a librarian do if an unattended child remains at closing time? Can nonresidents get a library card? What is the library's position on Internet filters? These are but a few of the kinds of issues that require clear, up-to-date library policies. If your staff makes decisions on the fly, if policies are nonexistent, outdated, and no one knows what they are, your library may be experiencing policy chaos. The answer is to create current, customized policies geared to your library. Now it's easier than ever using this one-stop, step-by-step guide that dovetails with PLA's *The New Planning for Results*. Covering governance and organizational structure, management policies, and services relating to customers, circulation, information, and groups, this comprehensive how-to addresses each major library area. Follow these guidelines to assess existing policies, develop new ones, and communicate all changes to improve consistency.

Strategies for Teaching Writing Feb 08 2021 Writing is the vehicle for communication. In addition to promoting the need for good communication skills, the teaching of the writing process provides opportunities for students to develop clear thinking skills. Writing is also a developmental process that each student can successfully experience at different levels when approached systematically. Based upon this premise, this Action Tool presents the five stages of writing: prewrite, write, revise, edit, and publish in a manner that allows writing to be taught as a process. *Strategies for Teaching Writing: An ASCD Action Tool* makes writing in the classroom manageable. The tools provide a step-by-step approach to teaching the writing process. The tools include complete how-to-use instructions, suggestions, classroom examples and cross-curricular activities. Using the tools, teachers can grant students time to write, to process their thoughts and develop a way to analyze their thinking using cognitive reasoning instead of impromptu thought. The Action Tool also provide teachers with assessment strategies to assess students participation and progress at each stage of the writing process.

Mindful Crafts as Therapy Feb 29 2020 Arts and crafts were one of the very first therapies employed by occupational therapists. Today, crafts are still employed as effective interventions for clients with mental health disorders, physical dysfunctions, cognitive issues, and sensory concerns in hospitals, outpatient clinics, veterans' centers, schools, skilled nursing facilities, or community settings. Step by step, the authors show you how to use a wide-range of novel, and highly engaging crafts. They explain how to connect the key tasks associated with an activity to functional outcomes, and how to modify them to meet the specific needs of individual patients. They also address the issues of documentation, and reimbursement.

Handbook on Agent-Oriented Design Processes Dec 01 2022 To deal with the flexible architectures and evolving functionalities of complex modern systems, the agent metaphor and agent-based computing are often the most appropriate software design approach. As a result, a broad range of special-purpose design processes has been developed in the last several years to tackle the challenges of these specific application domains. In this context, in early 2012 the IEEE-FIPA Design Process Documentation Template SC0097B was defined, which facilitates the representation of design processes and method fragments through the use of standardized templates, thus supporting the creation of easily sharable repositories and facilitating the composition of new design processes. Following this standardization approach, this book gathers the documentations of some of the best-known agent-oriented design processes. After an introductory section, describing the goal of the book and the existing IEEE FIPA standard for design process documentation, thirteen processes (including the widely known Open UP, the de facto standard in object-oriented software engineering) are documented by their original creators or other well-known scientists working in the field. As a result, this is the first work to adopt a standard, unified descriptive approach for documenting different processes, making it much easier to study the individual processes, to rigorously compare them, and to apply them in industrial projects. While there are a few books on the market describing the individual agent-oriented design processes, none of them presents all the processes, let alone in the same format. With this handbook, for the first time, researchers as well as professional software developers looking for an overview as well as for detailed and standardized descriptions of design processes will find a comprehensive presentation of the most important agent-oriented design processes, which will be an invaluable resource when developing solutions in various application areas.

Ecuador Nov 07 2020 This data module of the Report on the Observance of Standards and Codes (ROSC) contains a summary assessment of dissemination practices in Ecuador relative to the IMF's Special Data Dissemination Standard (SDDS). It also presents an assessment of data quality for national accounts, consumer price, producer price, balance of payments, government finance, and monetary statistics, based on the Data Quality Assessment Framework (DQAF). The assessment reveals that Ecuador is in observance of SDDS specifications on coverage, periodicity, timeliness, and dissemination of advance release calendars for data subject to the SDDS.

Office 2008 for Macintosh: The Missing Manual Mar 24 2022 Still the top-selling software suite for Mac users, Microsoft Office has been improved and enhanced to take advantage of the latest Mac OS X features. You'll find lots of new features in Office 2008 for Word, Excel, PowerPoint and Entourage, but not a page of printed instructions to guide you through the changes. Office 2008 for Macintosh: The Missing Manual gives you the friendly, thorough introduction you need, whether you're a beginner who can't do more than point and click, or a power user who's ready to tackle a few advanced techniques. To cover Word, Excel, PowerPoint and Entourage, this guide gives you four superb books in one -- a separate section each for program! You can manage your day and create professional-looking documents, spreadsheets, and presentations in no time. Office 2008 has been redesigned so that the windows, toolbars, and icons blend in better with your other Mac applications. But there are still plenty of oddities. That's why this Missing Manual isn't shy about pointing out which features are gems in the rough -- and which are duds. With it, you'll learn how to: Navigate the new user interface with its bigger and more graphic toolbars Use Word, Excel, PowerPoint, and Entourage separately or together Keep track of appointments and manage daily priorities with the My Day feature Create newsletters, flyers, brochures, and more with Word's Publishing Layout View Build financial documents like budgets and invoices with Excel's Ledger Sheets Get quick access to all document templates and graphics with the Elements Gallery Organize all of your Office projects using Entourage's Project Center Scan or import digital camera images directly into any of the programs Customize each program with power-user techniques With Office 2008 for Macintosh: The Missing Manual, you get objective and entertaining instruction to help you tap into all of the features of this powerful suite, so you can get more done in less time.

Mitten Tree Mar 31 2020 One snowy day an elderly woman, Sarah, watches children gathering at the bus stop. While they never seem to notice her, she notices them, especially one little boy who has no mittens. That night, Sarah knits the boy a pair of cozy mittens and places them on the blue spruce tree for him to discover. It soon becomes a game, with the children looking for new mittens on the mysterious tree every morning, and Sarah joyfully knitting new ones each night. With its touching message and delightful illustrations, adults and children will enjoy this intergenerational tale for years to come.

Accessing Autodesk Architectural Desktop 2006 May 02 2020 Written for all levels, this book offers engaging, step-by-step tutorials and projects that clearly demonstrate and reinforce the real-world application of Autodesk

Architectural Desktop. (ADT) tools. Each ADT tool is introduced, followed by a thorough explanation of the options of the command and how it is used in the development of drawings. Users can expect to gain familiarity with ADT through the use of applications that involve the creation of floor plans, foundation plans, elevations, sections, details, and presentation drawings for a two-story residence, including a basement. Additional tutorials survey the techniques of creating architectural and structural drawings for commercial buildings. Coverage examines use of the Detail Component Manager and keynoting of details, as well as the newest features of sheet sets integrated into the Project Navigator for creating working drawings as a project progresses.

Information Systems Development Aug 24 2019 Information Systems Development: Business Systems and Services: Modeling and Development, is the collected proceedings of the 19th International Conference on Information Systems Development held in Prague, Czech Republic, August 25 - 27, 2010. It follows in the tradition of previous conferences in the series in exploring the connections between industry, research and education. These proceedings represent ongoing reflections within the academic community on established information systems topics and emerging concepts, approaches and ideas. It is hoped that the papers herein contribute towards disseminating research and improving practice.

*Distributed Programming with Ruby Sep 25 2019 Complete, Hands-On Guide to Building Advanced Distributed Applications with Ruby Distributed programming techniques make applications easier to scale, develop, and deploy—especially in emerging cloud computing environments. Now, one of the Ruby community's leading experts has written the first definitive guide to distributed programming with Ruby. Mark Bates begins with a simple distributed application, and then walks through an increasingly complex series of examples, demonstrating solutions to the most common distributed programming problems. Bates presents the industry's most useful coverage of Ruby's standard distributed programming libraries, DRb and Rinda. Next, he introduces powerful third-party tools, frameworks, and libraries designed to simplify Ruby distributed programming, including his own *Distribunaut*. If you're an experienced Ruby programmer or architect, this hands-on tutorial and practical reference will help you meet any distributed programming challenge, no matter how complex. Coverage includes Writing robust, secure, and interactive applications using DRb—and managing its drawbacks Using Rinda to build applications with improved flexibility, fault tolerance, and service discovery Simplifying DRb service management with RingyDingy Utilizing Starfish to facilitate communication between distributed programs and to write MapReduce functions for processing large data sets Using Politics to customize the processes running on individual server instances in a cloud computing environment Providing reliable distributed queuing with the low-overhead Starling messaging server Implementing comprehensive enterprise messaging with RabbitMQ and Advanced Message Queuing Protocol (AMQP) Offloading heavyweight tasks with BackgroundDRb and DelayedJob*

Improving the Regulatory Review Process Jan 10 2021 Regulatory review is the last major development hurdle that must be passed by a new medicine before it reaches the market. At a time when pharmaceutical companies are reviewing their R&D strategies, and attempting to reduce drug development times, it is extremely important that the review process is made as efficient as possible. The 11th CMR Workshop, held in September 1995, provided the opportunity for regulatory authority and industry personnel from Europe, North America, Australia and Japan to openly discuss views and exchange experiences on the subject of improving the review process. The proceedings of this meeting provide a comprehensive overview of the current review process around the world. The contributors describe the present situation and highlight company strategies and regulatory initiatives to improve the review process. This volume also summarises the suggestions that were developed by the participants, covering many facets of this process, including the quality and size of the dossier, dialogue, submission strategies, feedback and the response to questions.

Autodesk Architectural Desktop 2005 Jul 04 2020 This versatile text provides a hands-on, guided tutorial through Autodesk Architectural Desktop 2005. Tool Palettes are presented in the order in which they are commonly used, which provides a logical organization to the text. Numerous walk-throughs and hands-on activities are used throughout the text to teach commands and routines in relation to the production of architectural drawings. The organization of topics and the presentation of commands in context of applications make this text appropriate for both the traditional classroom and self-paced instruction.

Encyclopedia of Cloud Computing Oct 31 2022 The Encyclopedia of Cloud Computing provides IT professionals, educators, researchers and students with a compendium of cloud computing knowledge. Authored by a spectrum of subject matter experts in industry and academia, this unique publication, in a single volume, covers a wide range of cloud computing topics, including technological trends and developments, research opportunities, best practices, standards, and cloud adoption. Providing multiple perspectives, it also addresses questions that stakeholders might have in the context of development, operation, management, and use of clouds. Furthermore, it examines cloud computing's impact now and in the future. The encyclopedia presents 56 chapters logically organized into 10 sections. Each chapter covers a major topic/area with cross-references to other chapters and contains tables, illustrations, side-bars as appropriate. Furthermore, each chapter presents its summary at the beginning and backend material, references and additional resources for further information.

Regulated Open Multi-Agent Systems (ROMAS) Feb 20 2022 Addressing the open problem of engineering normative open systems using the multi-agent paradigm, normative open systems are explained as systems in which heterogeneous and autonomous entities and institutions coexist in a complex social and legal framework that can evolve to address the different and often conflicting objectives of the many stakeholders involved. Presenting a software engineering approach which covers both the analysis and design of these kinds of systems, and which deals with the open issues in the area, ROMAS (Regulated Open Multi-Agent Systems) defines a specific multi-agent architecture, meta-model, methodology and CASE tool. This CASE tool is based on Model-Driven technology and integrates the graphical design with the formal verification of some properties of these systems by means of model checking techniques. Utilizing tables to enhance reader insights into the most important

requirements for designing normative open multi-agent systems, the book also provides a detailed and easy to understand description of the ROMAS approach and the advantages of using ROMAS. This method is illustrated with case studies, in which the reader may develop a comprehensive understanding of applying ROMAS to a given problem. The case studies are presented with illustrations of the developments. Reading this book will help readers to understand the increasing demand for normative open systems and their development requirements; understand how multi-agent systems approaches can be used to deal with the development of systems of this kind; to learn an easy to use and complete engineering method for large-scale and complex normative systems and to recognize how Model-Driven technology can be used to integrate the analysis, design, verification and implementation of multi-agent systems.
