The novel debating approach that is taken generates a rich understanding of the range of ways in which bad leadership is created, manifested and most importantly, remedied.” - Professor Brad Jackson, Waikato Management School, The University of Waikato, New Zealand “In the midst of a world full of incompetent and incoherent leaders this book is exactly what we need: a veritable cornucopia of critical leadership studies.” - Keith Grint, Professor Emeritus, Warwick Business School, UK “While we like to have leaders who guide, looking at the present state of the world, there are far too many leaders who misguide. It makes this anthology on bad leadership more than timely. The various contributors, taking many different perspectives, highlight the ways leaders can go astray. In these very difficult times, this book will be a must read for anybody interested in this subject.” - Manfred F. R. Kets de Vries, Clinical Professor of Leadership “Debating Bad Leadership, edited by Anders Örténblad, is a book for this time! The rise of populism and the emergence of so-called ‘strong’ leaders in many countries have created a social, political, and economic climate that begs for closer examination of the origins, characteristics, and forms of, especially, bad leadership. Taking as its starting-point the question of why there are so many bad leaders in the corporate world, the impressive collection of chapters compiled in Debating Bad Leadership canvasses a comprehensive array of issues ranging from toxic, psychopathic, leadership and ethical failure to issues of poor selection, ill-considered recruitment, leader (in)competence, conflicted or weak followership, to the very concept of leadership itself. In debating these fundamental issues, this book illuminates and educates, and offers some remedies, both theoretically and practically. Debating Bad Leadership challenges scholars, students and practitioners of leadership to continue this fundamental discussion, for the benefit of us all.” - Gabriele Lakomski Professor Emeritus, Melbourne Centre for the Study of Higher Education, University of Melbourne, Australia. In this book, leadership experts explore why there are so many bad leaders, and suggest remedies for how the current situation could be improved. Some of the experts suggest that reasons for why bad leaders are so common are searched for in people: more specifically leaders-to-become, acting leaders or followers. Others suggest that reasons are to be found in the leadership role (or expectations on those having such role), in the lack of support for leaders, or in beliefs about leadership. On the backdrop of their suggested explanations as to why there are so many bad leaders, the experts suggest remedies that could be taken to decrease the number of bad leaders as well as their negative impact. The very presumption that this book rests upon also gets its fair share of critique, by some of the experts. Anders Örténblad is Professor of Working Life Science at the University of Agder, Norway. He is the editing founder of the book series Palgrave Debates in Business and Management. Myocarditis is a clinical syndrome, most frequently of infectious etiology, that occurs with a broad range of relatively non-specific symptoms, and consists of an inflammatory process of the heart with necrosis and degeneration of the myocardium by inflammatory infiltration of immune cells. In this book, the broad aspects of myocarditis are fully presented by leading international experts. The texts are devoted to both clinical aspects and pathophysiology, and they present comprehensive reviews of the causes of myocarditis, its classification, diagnosis, and treatment, as well as myocarditis in special populations such as pediatric, peripartum and chronic chagasic myocarditis.
