In 1994, the Pacific island village of Matupit was partially destroyed by a volcanic eruption. This study focuses on the subsequent reconstruction and contests over the morality of exchanges that are generative of new forms of social stratification. Such new dynamics of stratification are central to contemporary processes of globalization in the Pacific, and more widely. Through detailed ethnography of the transactions that a displaced people entered into in seeking to rebuild their lives, this book analyses how people re-make sociality in an era of post-colonial neoliberalism without taking either the transformative power of globalization or the resilience of indigenous culture as its starting point. It also contributes to the understanding of the problems of post-disaster reconstruction and development projects. Pushing Petals Can Be Murder... 3 books. over 600 pages of Laughs, Mystery and Romance! The Final Arrangement Two fighting florists. One dead body. Can she catch the real killer before she's planted in jail? Quincy McKay is ready for a fresh start. Finally free of her good-for-nothing ex, she can't wait to grow her aunt's struggling small-town floral boutique. But her hopes wither and die when her biggest competitor is found dead and she's accused of murder. Teaming up with her blunt-speaking elderly friend, and a dreamy cop, Quincy desperately digs for clues to prove she didn't do it. But her mother's gossip network and the return of her crazy ex threaten to blight her investigation. Can Quincy unearth the culprit, or will she be buried along with her business? The Final Arrangement is the first book in the charming Flower Shop cozy mystery series. If you like quirky characters, bizarre cases, and a light sprinkling of romance, then you'll love Annie Adams' freshly picked tale. Deadly Arrangements Wedding bells are ringing and the groom has gone missing in small town Hillside. Florist Quincy McKay was all set for wedding season, until the groom from one wedding disappeared and the groom from another became the prime suspect. Hard for a florist to make a living on weddings without the grooms, and even harder for her to stay out of the investigation, when the suspected culprit is the fiancé of her truth-telling older friend and sidekick, K.C. All Quincy wants is success in business, a happy family and the perfect romance with Alex Cooper, the hottest cop in the state. Not necessarily in that order, of course. The trouble is, between Alex's job and everyone else's weddings, it's getting harder and harder for Quincy and Alex to find any time to themselves. Every time the flames of passion ignite between them, someone or something shows up to fizzle the fire, including her meddling mother, her formerly absent father and even Elma, the handsiest waitress in the West. Just when Quincy thinks nothing else could go wrong, a ghost from Alex's past comes back to haunt them both, which could keep them apart forever if someone doesn't kill Quincy first. She stumbles into the clues to solve the case of the missing groom and finds a corpse as well, with the real culprit right on her sensible but stylishly clad heels, proving that planning a wedding can literally be murder. Deadly Arrangements is the second book in the charming Flower Shop cozy mystery series. If you like quirky characters, bizarre cases, and a little romance, too, then you'll love Annie Adams' funny, feisty mystery. A Christmas Arrangement It's Christmastime in Hillside, but holiday spirit is in short supply for busy flower shop owner Quincy McKay. She's in charge of the town festival and her shop's open house, but her Santa's a no-show and her flower cooler is on the fritz. To make matters worse, she's learned her ex-husband isn't as ex as she'd thought. Just when she thought things couldn't get any worse, her boyfriend, hot cop Alex Cooper announces his parents are coming to town. Alex is the perfect man in Quincy's book, unfortunately his mother thinks he's perfect too. And no woman is perfect enough for her perfect son, especially not the weird flower shop girl who works too much, can't cook and who she catches kissing another man in the department store. And what's this she heard about Quincy being married? Eleanor Cooper must help her son dodge a bullet (and not the kind from his job) during the romantic holiday season to prevent him from being ensnared in a regrettable relationship. Quincy's dignity (of which lately she's in short supply), her reputation, and every business in town are riding upon the success of the city's Christmas celebration. If she can figure out a way to make it work despite failing equipment, helpers as flaky as the falling snow, and a troubling and inappropriate Secret Santa, she might win the respect of everyone in the town, but more importantly, Alex's parents. If Alex can survive his loving but meddling mother until Christmas, and keep Quincy safe from her crazy ex-husband, with a little help from the MLM (Mormon Ladies Mafia), and K.C. the she-Santa, he'll arrange for the perfect holiday for himself and the woman who has captured his heart Buy The Arrangements to weed out a small-town murderer today! Vince Locker's life is tragic. His comedy act for the LaughCom competition has just bombed, ruining any chance of the cash prize he desperately needed. His life is in tatters; abandoned by his father as a child, an estranged wife, Jessica, who he seems to disappoint just by his mere existence, and living in his mother's house with his bipolar brother and facing foreclosure. As he stands on Smith Avenue Bridge, suicide seems the only option until he is unexpectedly rescued by an old school mortician named Truss. Vince meets another of Truss's rescues, Winona. Although beyond social norms, the trio seize on a quick cash fix that just might help Vince meet his child support demands-comedic tributes for the dead. The eulogies are hilarious and off the wall, sometimes disastrous and sometimes enlightening. They propel Vince into the dark underworld of the funeral industry, life insurance scams, savage politics, a kidnapping, the murder investigation of a destitute unclaimed young woman and threats to Jessica and his young daughter. As details of the murdered young woman are slowly revealed, Vince realizes that he has many ghosts of his own to put to rest. The story is a brilliant thought-provoking exploration of grief and death nested in clever humor. Funeral expenses in the United States average more than \$10,000. And every year conventional funerals bury millions of tons of wood, concrete, and metals, as well as millions of gallons of carcinogenic embalming fluid. There is a better way, and Elizabeth Fournier, affectionately dubbed the "Green Reaper"; walks you through it, step-by-step. She provides comprehensive and compassionate guidance, covering everything from green burial planning and home funeral basics to legal guidelines and outside-the-box options, such as burials at sea. Fournier points the way to green burial practices that consider both the environmental well-being of the planet and the economic well-being of loved ones. A death occurs about every twelve seconds in the United States, according to the US Census Bureau. What happens in the hours and days following a death is something most of us have no knowledge of. In Getting Smart about Death, author Jane Filetic changes that by sharing basic information that can make a world of difference. Using

an efficient, need-to-know manner, she covers such topics as: • the four things needed immediately after a death occurs; • ten helpful suggestions to consider when a death is imminent; • answers to frequently asked questions following a death; • the times in life when it is essential to express our own final wishes. Getting Smart about Death is a simple, straightforward guide that will help you be prepared when a parent, spouse, partner, sibling, child, or best friend is nearing the end of life or has reached the end of life. Information is not just power; in the case of death, it is peace of mind. Examines the embalming process and the impact the standard funeral has on the environment while also discussing alternative eco-friendly burials. The blogger behind Confessions of a Funeral Director—what Time magazine called a "must read"—reflects on mortality and the powerful lessons death holds for every one of us in this compassionate and thoughtful spiritual memoir that combines the humor and insight of Smoke Gets in Your Eyes with the poignancy and brevity of When Breath Becomes Air. We are a people who deeply fear death. While humans are biologically wired to evade death for as long as possible, we have become too adept at hiding from it, vilifying it, and—when it can be avoided no longer—letting the professionals take over. Sixth-generation funeral director Caleb Wilde understands this reticence and fear. He had planned to get as far away from the family business as possible. He wanted to make a difference in the world, and how could he do that if all the people he worked with were . . . dead? Slowly, he discovered that caring for the deceased and their loved ones was making a difference—in other people’s lives to be sure, but it also seemed to be saving his own. A spirituality of death began to emerge as he observed: The family who lovingly dressed their deceased father for his burial The act of embalming a little girl that offered a gift back to her grieving family The nursing home that honored a woman’s life by standing in procession as her body was taken away The funeral that united a conflicted community Through stories like these, told with equal parts humor and poignancy, Wilde offers an intimate look into the business and a new perspective on living and dying This Handbook reviews the state of mortuary archaeology and its practice with forty-four chapters focusing on the history of the discipline and its current scientific techniques and methods. Written by leading scholars in the field, it derives its examples and case studies from a wide range of time periods and geographical areas. Valentine bares her own soul . . . with visceral attention to physical and emotional detail' - Wendy Moore, Guardian 'A fascinating portrait . . . one seriously intriguing read' - Glamour 'A grisly topic, but a glorious read' - Mail on Sunday A day in the life of Carla Valentine - curator, pathology technician and 'death professional' - is not your average day. She spent ten years training and working as an Anatomical Pathology Technologist: where the mortuary slab was her desk, and that day's corpses her task list. Past Mortems tells Carla's stories of those years, as well as investigating the body alongside our attitudes towards death - shedding light on what the living can learn from dead and the toll the work can take on the living souls who carry it out. Fascinating and insightful, Past Mortems reveals the truth about what happens when the mortuary doors swing shut or the lid of the coffin closes . . . Szabo presents a thorough bibliographical examination of the funeral industry and related subjects. Most citations are annotated, with special notes on editions and reprints. The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya, the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya. This ambitious work offers a coherent and comprehensive look at the material conditions underlying and stimulating political development in southeastern North America during the Mississippian period. After introducing theoretical issues, Muller addresses reproduction, production, distribution, and consumption within their social and material contexts. Examined through the lens of the production, distribution, and consumption of prestige and staple goods, a profoundly domestic, though significantly differentiated, Mississippian political economy emerges. This study's broad synthetic view ensures that neither environment nor ideology are overemphasized. A fine statement of an important theoretical position, the volume features considerable graphic and tabular presentation of data. Indianapolis Monthly is the Circle City’s essential chronicle and guide, an indispensable authority on what’s new and what’s news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy’s cultural landscape. This practical volume focuses on the study of historic burial ground monuments but also covers some below ground archaeology, as some projects will involve the study of both. It will be an incomparable source for academic archaeologists, cultural resource and heritage management archaeologists, government heritage agencies, and upper-level undergraduate and graduate students of archaeology focused on the historic or post-medieval period, as well as forensic researchers and anthropologists. **THE NEW YORK TIMES BESTSELLER** 'Unforgettable . . . a hilarious, poignant and impassioned plea to revolutionise our attitudes to death' Gavin Francis, Guardian From her first day at Westwind Cremation & Burial, twenty-three-year-old Caitlin Doughty threw herself into her curious new profession. Coming face-to-face with the very thing we go to great lengths to avoid thinking about she started to wonder about the lives of those she cremated and the mourning families they left behind, and found herself confounded by people's erratic reactions to death. Exploring our death rituals - and those of other cultures - she pleads the case for healthier attitudes around death and dying. Full of bizarre encounters, gallows humour and vivid characters (both living and very dead), this illuminating account makes this otherwise terrifying subject inviting and fascinating. There has been much recent celebration of the success of African 'civil society' in forging global connections through an ever-growing diaspora. Against the background of such celebrations, this innovative book sheds light on the diasporic networks - 'home associations' - whose economic contributions are being used to develop home. Despite these networks being part of the flow of migrants' resources back to Africa that now outweighs official development assistance, the relationship between the flow of capital and social and political change are still poorly understood. Looking in particular at Cameroon and Tanzania, the authors examine the networks of migrants that have been created by making 'home associations' international. They argue that claims in favour of enlarging 'civil society' in Africa must be placed in the broader context of the political economy of migration and wider debates concerning ethnicity and belonging. They demonstrate both that diasporic development is distinct from mainstream development, and that it is an uneven historical process in which some 'homes' are better placed to take advantage of global connections than others. In doing so, the book engages critically with the current enthusiasm among policy-makers for treating the African diaspora as an untapped resource for combating poverty. Its focus on diasporic networks, rather than private remittances, reveals the particular successes and challenges diasporas face in acting as a group, not least in mobilising members of the diaspora to fulfill obligations to home. Janet Richards considers social stratification in Middle Kingdom Egypt, exploring the assumption that a 'middle class' arose during this period. By focusing on the entire range of mortuary behavior, she shows how Middle Kingdom Egyptian practices and landscapes relating to death reveal information about the living society. "Kate Mayfield's first foray into nonfiction is a vivid Southern memoir that reads like a novel, about growing up in Jubilee, Kentucky as the daughter of a charismatic but troubled small-town undertaker--imagine Mad Men's Sally Draper growing up in the world of The Help"-- The book is based on the experience of the owner of a mortuary transportation company who has been in the business for over 25 years. The book gives the reader honest and specific information about the business of transporting human remains. You will learn about the physical and mental challenges involved, and why this business offers a unique opportunity for someone interested in starting their own small business. The book covers everything from how to find the equipment you will need, what kind of vehicle is best suited for this work, what are the laws governing the industry, how to keep appropriate records, how to hire employees, what kind of training is needed, what should you charge for your service and what kind of money can you make. This business will not be something everyone can do, but for those who have an inherent respect for treating the deceased with care and dignity, this business has much to offer including low overhead, high profits and the chance to help people going through a very difficult time. “Nobody wanted to go at first. California was practically uninhabited except for the Indians. Those first residents had to be paid to go and there were few takers. The first years were hard and supplies scarce. Still, those early families managed to grow enough foodstuffs to plant a firm hold in the land. It was truly a cultural melding from the first — of Indian, Spanish and Mexican people and a few others. Then in 1848, California joined the United States. That move — and the lure of gold nearby — gave the city the boost it needed.” “Newcomers soon realized the land was good. Fruits and flowers were abundant and the climate mild. It was the kind of place men dreamed of — and many followed their dreams. They called it the Garden City. Like all cities, it had its problems. But its leaders were both dreamers and doers — they anticipated, prepared and planned. The growth from a struggling outpost to a complex cultural and economic society has been a major evolution — and a tribute to those who made their dreams — and the

city of San Jose — come true.” San Jose: California’s First City California’s first city, San Jose, represents a microcosm of the development of the Golden State’s urban centers. Over the last two centuries, the “Garden City” has occupied an important position as California’s first civilian settlement, first state capital, leading agricultural center and nucleus of the space-age electronics industry. As narrated by the distinguished historian Edwin A. Beilharz, San Jose was founded as a planned civil settlement. In 1777, Governor Felipe de Neve established the pueblo in the lush Santa Clara Valley to provide a reliable food source for the growing yet isolated colony of Alta California. It soon emerged as a major producer of cereal grains, orchard fruit and cattle. During the Spanish and Mexican era, San Jose also served as a social center for the nearby ranchos and attracted such influential families as Peralta, Suriol, Castro and Vasquez. By the late 1830s and 1840s, foreign visitors eyed California with envy. Several saw the promise of the verdant valley. Political upheavals in Mexico made possible the easy assimilation of non-Mexican residents. With the conclusion of the Mexican War and the ‘Treaty of Guadalupe Hidalgo in 1848, San Jose and California became a formal possession of the United States. Donald O. DeMers takes up the story with the establishment of American rule in California. The discovery of gold on the American River changed the entire complexion of California and quickly led to admission as a state in 1850. As the result of a strong lobbying effort, the newly formed state government selected San Jose as its first capital. Political infighting ensued, and the state Legislature moved the capital to Benecia after only one year. Despite this blow, the city on the Guadalupe River continued to expand, capitalizing on its mild climate, abundant water supply, proximity to San Francisco Bay and fertility of the Santa Clara Valley. Confusion over Mexican land grants also opened vast tracts of land for development. San Jose took prominence in wine production, fruit raising, silk culture, nurseries and agricultural experimentation. The advent of the railroad made possible the establishment of a packing and shipping economy. The pueblo was soon transformed from a collection of crude adobes to one of frame houses, brick business blocks, schools, churches, theaters and parks replete with horsecars traveling along tree-lined streets. After the 1906 earthquake, San Jose entered the twentieth century as a typical American city. It experienced the anxiety of World War I, jubilation of the 1920s, subterfuge of prohibition and the Great Depression. During this time, too, sensational events rocked the city — the tragic Hart kidnapping and the lynchings at St. James Park. World War II shifted the socio-economic base from a land of gardens and orchards to that of a defense production center. The burgeoning population of defense workers, engineers and scientists created a new force for continued development. Excerpt From: Edwin A. Beilharz and Donald O. DeMers Jr. “San Jose California’s First City.” iBooks. Too Strong to Be Broken explores the dynamic life of Edward J. Driving Hawk, a Vietnam and Korean War veteran, chairman of the Rosebud Sioux Tribe, former president of the National Congress of American Indians, husband, father, recovered alcoholic, and convicted felon. Driving Hawk’s story begins with his childhood on the rural plains of South Dakota, then follows him as he travels back and forth to Asia for two wars and journeys across the Midwest and Southwest. In his positions of leadership back in the United States, Driving Hawk acted in the best interest of his community, even when sparring with South Dakota governor Bill Janklow and the FBI. After retiring from public service, he started a construction business and helped create the United States Reservation Bank and Trust. Unfortunately, a key participant in the bank embezzled millions and fled, leaving Driving Hawk to take the blame. Rather than plead guilty to a crime he did not commit, the seventy-four-year-old grandfather went to prison for a year and a day, even as he suffered the debilitating effects of Agent Orange. Driving Hawk fully believes that the spirits of his departed ancestors watched out for him during his twenty-year career in the U.S. Air Force, including his exposure to Agent Orange, and throughout his life as he survived surgeries, strokes, a tornado, a plane crash, and alcoholism. With the help of his sister, Virginia Driving Hawk Sneve, Driving Hawk recounts his life’s story alongside his wife, Carmen, and their five children. Annotation A history of the discovery and interpretation of medieval burials in Gaul (what would eventually become France). An expose on America's multimillion-dollar burial policy.
