Fifty Key Thinkers on History is an essential guide to the most influential historians, theorists and philosophers of history. The entries offer comprehensive coverage of the long history of historiography ranging from ancient China, Greece and Rome, through the Middle Ages to the contemporary world. This third edition has been updated throughout and features new entries on Machiavelli, Ranajit Guha, William McNeil and Niall Ferguson. Other thinkers who are introduced include: Herodotus Bede Ibn Khaldun E. H. Carr Fernand Braudel Eric Hobsbawm Michel Foucault Edward Gibbon Each clear and concise essay offers a brief biographical introduction; a summary and discussion of each thinker's approach to history and how others have engaged with it; a list of their major works and a list of resources for further study. This book chronicles the Society's activities over fifty years, as membership grew, as publications became more numerous

and diverse, as the number of meetings and conferences increased, and as services to the mathematical community expanded. To download free chapters of this book, [click here](#). We all know our sweets. We all remember sweets – objects of pure delight and the endless cause of squabbles, fights even, hoarding and swapping; a chance to gorge, suck, crunch and chew. But they 're by no means just a nostalgic thing of days past, and it 's not only children who love and devour sweets – gobstoppers, bulls eyes, licorice, seaside rock, bubble gum and the like; grown-ups of all ages are partial to a good humbug, or a lemon sherbet or two – in the car, (annoyingly) at the cinema or while out walking – wherever and whenever, the sweet is there, the sweet delivers and the sweet rarely disappoints. Sweets then are ubiquitous and enduring; they cross age, culture and gender boundaries and they have been around, it seems, forever. This book tells the story of sweets from their primitive beginnings to their place today as a billion pound commodity with its sophisticated, seductive packaging and sales, advertising and marketing. It explores the people 's favorites, past and present; but there is also a dark side to sweets – and this book does not shy away from the deleterious effect on health as manifested in obesity, tooth decay and diabetes. It delves into sweet and candy shops in supermarkets and markets, retro sweet shops, fudge makers, vintage sweets online, sweet manufacturing, chocolate, the grey line between sweets and ' medicines ' ancient and modern. It goes round the world sucking, licking and crunching sweets from different

countries and cultures and it examines how immigrants from all nations have changed our own sweet world. Books that Changed the World tells the fascinating stories behind 50 books that, in ways great and small, have changed the course of human history. Andrew Taylor sets each text in its historical context and explores its wider influence and legacy. Whether he's discussing the incandescent effect of The Qu'ran, the enduring influence of Adam Smith's Wealth of Nations, of the way in which Uncle Tom's Cabin by Harriet Beecher Stowe galvanised the anti-slavery movement, Taylor has written a stirring and informative testament to human ingenuity and endeavour. Ranging from The Iliad to Harry Potter and the Philosopher's Stone, the Kama Sutra to Lady Chatterley's Lover, this is the ultimate, thought-provoking read for book-lovers everywhere. Wilkinson charts the evolution of musical instruments, profiling the instruments that have joined the orchestra from the Baroque era of the 1600s up to the modern age. The origin and development of each instrument is described. Includes brief information on the instrument makers, composers, and musicians who have made them famous. Fifty Key Works of History and Historiography introduces some of the most important works ever written by those who have sought to understand, capture, query and interpret the past. The works covered include texts from ancient times to the present day and from different cultural traditions ensuring a wide variety of schools, methods and ideas are introduced. Each of the fifty texts represents at least

one of six broad categories: early examples of historiography (e.g. Herodotus and Augustine) non-western works (e.g. Shaddad and Fukuzawa) ' Critical ' historiography (e.g. Mabillon and Ranke) history of minorities, neglected groups or subjects (e.g. Said and Needham) broad sweeps of history (e.g. Mumford and Hofstadter) problematic or unconventional historiography (e.g. Foucault and White). Each of the key works is introduced in a short essay written in a lively and engaging style which provides the ideal preparation for reading the text itself. Complete with a substantial introduction to the field, this book is the perfect starting point for anyone new to the study of history or historiography. Fifty Key Thinkers on History is an essential guide to the most influential historians, theorists and philosophers of history. The entries offer comprehensive coverage of the long history of historiography ranging from ancient China, Greece and Rome, through the Middle Ages to the contemporary world. This third edition has been updated throughout and features new entries on Machiavelli, Ranajit Guha, William McNeil and Niall Ferguson. Other thinkers who are introduced include: Herodotus Bede Ibn Khaldun E. H. Carr Fernand Braudel Eric Hobsbawm Michel Foucault Edward Gibbon Each clear and concise essay offers a brief biographical introduction; a summary and discussion of each thinker ' s approach to history and how others have engaged with it; a list of their major works and a list of resources for further study. Fifty years in Amoy or, a history of the Amoy Mission, China.

Founded February 24, 1842. Under the Patronage of the American Board of Commissioners for Foreign Missions from 1842-1857. Transferred to the government of the Board of Foreign Mission of the Reformed (Dutch) Church in America in June, 1857.

For all of India's myths, stories and moral epics, Indian history remains a curiously unpeopled place. In *Incarnations*, Sunil Khilnani fills that space, recapturing the human dimension of how the world's largest democracy came to be. His trenchant portraits of emperors, warriors, philosophers, film stars and corporate titans—some famous, some unjustly forgotten—bring feeling, wry humour and uncommon insight to dilemmas that extend from ancient times to our own.

The history of photography is best revealed in the history of what makes it possible--the camera. "Cuba Since the Fifties" provides a much-needed account of the Cuban Revolution and Cuba's history over its fifty years of existence since 1959. Antoni Kapcia unravels the complexities of the sometimes perplexing, and often misunderstood process of continual change, and explains the Revolution's remarkable survival after the deep and potentially terminal crisis brought about by the collapse of the Soviet Bloc in 1989-91. This book looks at the process of social revolution and the benefits and disadvantages that accrued as a result. A unique introduction to the history of Boston through archaeological objects

Gorgeously repackaged, this reissue of the classic book presents the iconic photographer's expert and witty reminiscences of the personalities who inspired fashion's

golden eras, and left an indelible mark on his own sense of taste and style. "The camera will never be invented that could capture or encompass all that he actually sees," Truman Capote once said of Cecil Beaton. Though known for his portraits, Beaton was as incisive a writer as he was a photographer. First published in 1954, *The Glass of Fashion* is a classic—an invaluable primer on the history and highlights of fashion from a man who was a chronicler of taste, and an intimate compendium of the people who inspired his legendary eye. Across eighteen chapters, complemented by more than 150 of his own line drawings, Beaton writes with great wit about the influence of luminaries such as Chanel, Balenciaga, and Dior, as well as relatively unknown muses like his Aunt Jessie, who gave him his first glimpse of "the grown-up world of fashion." Out of print for decades but recognized and sought after as a touchstone text, *The Glass of Fashion* will be irresistible to a new generation of fashion enthusiasts and a seminal book in any Beaton library. It is both a treasury and a treasure. Mercedes-Benz Club of America (MBCA) and Turner Publishing Company are pleased to announce a new and unique book highlighting the MBCA as it celebrates its 50th Anniversary. This commemorative book will feature a large collection of never before published photographs and memorabilia and will highlight the first 50 years of the MBCA. This book is licensed and approved by the Mercedes-Benz Club of America. MBCA Editor, Bruce Adams, will author this quality-crafted book. This book will be a 9 x 12 -inch,

hardbound coffee-table volume, with hundreds of pages of photographs and memories. *The History of Fly Fishing in Fifty Flies* recounts the story of a sport that dates back two thousand years, focusing on milestone flies from the first feathered hook to contemporary patterns using cutting edge materials. From the many thousands of fly patterns developed over the centuries (there are more than 1,700 salmon fly patterns alone) these fifty have been chosen to represent the development not only of the flies themselves, but also the fly fishing techniques - and of rods, lines, and reels. These iconic flies also chart the spread of this addictive sport from its modern origins on the chalk streams of southern England and the rivers of Scotland to the US, Europe, South America and the Antipodes, and now to every country in the world. Once limited to trout and salmon, fly-fishing techniques today are used to catch every fish species from minnows to marlin, in rivers, lakes and oceans from the Amazon to the Arctic. Filled with profiles of the key characters, tying tips, photographs and illustrations of the flies, and detailed explanations of the techniques used to fish them, *The History of Fly Fishing in Fifty Flies* charts the exponential growth and diversification of this fascinating sport.

Football is more than just a game. Over the past 150 years it has become a source of identity, conflict and debate for all who follow and play it. Starting in Victorian England, *Football's Fifty Most Important Moments* journeys through 160 years of incredible events to the modern day, where new and innovative ideas are reshaping the game. A collection of

stories includes the insight of Henry Louis Gates, Jr., Helen Gurley Brown, and others on notable Americans whose contributions are much undervalued, including Christopher Isherwood, Albert Jay Nock, and Emma Goldman. The political leaders, writers, artists and philosophers of ancient Greece turned a few city states into a pan-Mediterranean civilization. But who were these people, what do we know of their lives and how did they interact with one another? This highly readable, original new approach to telling the history of Greece weaves together the lives of the movers and shakers of the Greek world into a continuous narrative up until the rise of Rome. From mathematics to politics, from painting and sculpture to sport, the reader will meet both the famous and less well-known figures such as Milo, the Olympic wrestler; Aspasia, the brilliant female intellectual; Zeuxis, the painter who invented trompe l'oeil; and Epaminondas, who taught tactics to Philip of Macedon. David Stuttard has written numerous books on the Classical world including 'The Parthenon: Power and Politics on the Acropolis'. Founded in 1966 by Ken and Sue Kramer, the Globe Theatre was Saskatchewan 's first professional theatre company, and, to this day, remains the only professional theatre-in-the-round in Canada. Inspired by their work with Brian Way 's theatre for children in London, England, the Kramers started the Globe as a touring company devoted to young audiences with a guiding philosophy of participation and access for all young people regardless of their location, economic means or initial

interest in theatre. A program of six adult productions per season was soon developed as well. The Globe Theatre pioneered a playwright in residence program, featuring Rex Deverell, and the beginnings of professional theatre training in the province. Through the terms of its subsequent artistic directors, Susan Ferley and current director Ruth Smillie, it continues to offer high-quality performances to audiences, professional theatre training to artists and drama classes to children and adults. Through it all, Globe principals have also been high-profile participants in the debates, the struggles and the development of the artistic community of the province as a whole. This is, indeed, a social history to be remembered and celebrated. A bold and original argument that upends the myth of the Fifties as a decade of conformity to celebrate the solitary, brave, and stubborn individuals who pioneered the radical gay rights, feminist, civil rights, and environmental movements, from historian James R. Gaines. In a fascinating and beautifully written series of character portraits, *The Fifties* invokes the accidental radicals—people motivated not by politics but by their own most intimate conflicts—who sparked movements for change in their time and our own. Among many others, we meet the legal pathfinder Pauli Murray, who was tortured by both her mixed-race heritage and her “in between” sexuality. Through years of hard work and self-examination, she turned her demons into historic victories. Ruth Bader Ginsberg credited her for the argument that made sex discrimination illegal, but that was only one of her gifts to

21st-century feminism. We meet Harry Hay, who dreamed of a national gay-rights movement as early as the mid-1940s, a time when the US, Soviet Union, and Nazi Germany viewed gay people as subversives and mentally ill. And in perhaps the book's unlikeliest pairing, we hear the prophetic voices of *Silent Spring*'s Rachel Carson and MIT's preeminent mathematician, Norbert Wiener, who from their very different perspectives—she in the living world, he in the theoretical one—converged on the then-heretical idea that our mastery over the natural world carried the potential for disaster. Their legacy is the environmental movement.

*The Fifties* is a dazzling and provocative work of history that transforms our understanding of a seemingly staid decade and honors the pioneers of gay rights, feminism, civil rights, and environmentalism. The book carries the powerful message that change actually begins not in mass movements and new legislation but in the lives of de-centered, often lonely individuals, who learn to fight for change in a daily struggle with themselves.

*The Hindu Society of Alberta* is the oldest Hindu organization in Edmonton. This study, celebrating and documenting the Society's foundation and life over its first half-century, will be enjoyed by members and friends of the Hindu community in Alberta and beyond. It also provides important documentation for future historians and sociologists interested in diaspora communities in Canada.

*The History of Fly Fishing in Fifty Flies* recounts the story of a sport that dates back two thousand years, focusing on milestone flies from the

first feathered hook to contemporary patterns using cutting edge materials. From the many thousands of fly patterns developed over the centuries (there are more than 1,700 salmon fly patterns alone) these fifty have been chosen to represent the development not only of the flies themselves, but also the fly fishing techniques - and of rods, lines, and reels. who was a chronicler of taste, and an intimate compendium of the people who inspired his legendary eye. Across eighteen chapters, complemented by more than 150 of his own line drawings, Beaton writes with great wit about the influence of luminaries such as Chanel, Balenciaga, and Dior, as well as relatively unknown muses like his Aunt Jessie, who gave him his first glimpse of "the grown-up world of fashion." It is both a treasury and a treasure.

*A History of Photography in 50 Cameras* explores the 180-year story of perhaps the most widely used device ever built. It covers cameras in all forms, revealing the origins and development of each model and tracing the stories of the photographers who used and popularized them. Illustrated throughout with studio shots of all fifty cameras and a selection of iconic photographs made using them, it is the perfect companion guide for camera and photography enthusiasts alike. The cameras include: The Nikon F, the "hockey puck" that saved photographer Don McCullin's life when it stopped a sniper's bullet during the Vietnam War. Its indestructibility, reliability and interchangeable lenses made it a favored workhorse of photojournalists. The Leica M3-D was also favored by war photographers, including David Duncan Douglas, who used the camera during his coverage of the Korean and Vietnam Wars. In 2012, one of his four customized Leica cameras sold at auction for nearly \$2 million. A Speed Graphic was used to take Sam Shere's widely published photograph of the 1937 Hindenburg disaster, "the world's most famous news

photograph ever taken." With few shots left and no time to get the camera to his eye, he shot his Pulitzer Prize-winning image "literally from the hip. It was over so fast there was nothing else to do." The camera phone has transformed picture-taking technology most profoundly since the invention of cameras. The "selfie" has become a new genre of photography practiced by everyone, and shared globally. This is an ideal book for camera collectors as well as anyone researching the history and art of photography. Illustrated stories about dogs that knew how to sit, stay, and witness history—from the loyal Greyfriars Bobby to Lizzie Borden's Boston Terriers. Most dog lovers know Fido and Laika, but how about Martha, Paul McCartney's Old English Sheepdog? Or Peritas, Alexander the Great's trusted canine companion? As long as there have been humans, those humans have had beloved companions—their dogs. From the ancient Egyptians mummifying their pups, to the Indian legend of the king who refused to enter the afterlife unless his dog was allowed there too, to the modern meme and popularity of terms like the corgi sploot, humans are undeniably obsessed with their dogs. Told in short, illustrated essays that are interspersed with both historical and canine factoids, *The History of the World in Fifty Dogs* brings to life some of history's most memorable moments through the stories of the dogs that saw them happen. The fascinating stories of the plants that changed civilizations. Spoil your dinner and rot your teeth with the ultimate book of sweetie nostalgia! An illustrated history of

plants presented through the stories of 50 key fossil discoveries. This is the lively, fully illustrated story of plant life on Earth as revealed through some of the most significant fossil discoveries ever made. Beginning with the origins of plant life in the sea, where photosynthesis first evolved in bacteria, the book traces the evolution of land plants, ferns, conifers and their relatives, and flowering plants. Each fossil is depicted with stunning full-color photography alongside narrative from paleobotanist Paul Kenrick explaining its significance and revealing the story behind its discovery. Interspersed throughout the book are contextual "snapshots" of landscapes and environments at various periods of geological time, focusing on plants and plant-animal interactions. *A History of Plants in Fifty Fossils* is perfect for anyone interested in plants, fossils, and the stories they tell us about life on Earth. A super-sweet guide to all your favourite sweets from years gone by. Includes *Forty Years Of Sangamo And Sangamo In Peace And War*.
