Dalton, a professor of racialist studies and an expert on inferior people of all ethnicities, genders, religions, and sexual preferences, everyone should be hated. A Practical Guide to Racism takes a satirical look at long-standing stereotypes and draws them out to their mad and illogical conclusions. At its core, this deeply sarcastic body of evidence suggests that, by the standards of racism, every race is terrible in its own right. A Practical Guide to Racism contains sparkling bits of wisdom on such subjects as: · The good life enjoyed by blacks, who shuffle through life unhindered by the white man's burdens, to become accomplished athletes, rhyme smiths, and dominoes champions · A close look at the bizarre, sweet-smelling race known as women, who are not very good at anything - especially ruling the free world · The sad story of the industrious, intelligent Jews, whose entire reputation is sullied by their taste for the blood of Christian babies · A crucial manual to Arabs, a people so sensitive they are liable to blow up at any time. "Sometimes a book appears on your desk that successfully defines a field. You look at the book and say "thank you." Planning and

Conducting Needs Assessments is such a book. . . . This book is clearly grounded in program planning and is not an afterthought or add-on to some other field. . . . I am excited to see this book appear in print. It clearly fills a niche that has been empty for some time: a practical approach to learning about and conducting needs assessments. . . . This is a marvelous book that should make a significant contribution to the field." --From the Foreword by Nick Eastmond, Utah State University "While it has the depth and breadth to be used in a classroom, Planning and Conducting Needs Assessments is written simply and directly enough to be a hands-on guide for needs assessment users and practitioners. The framework proposed by the authors is excellent in that it is readily understood and focuses attention on the most important details/issues in needs assessment practice. The fact that they also present an explanation of so many tools, including examples, makes the book required reading for anyone intending to plan or contract for a needs assessment." --John Theiss, Director of Planning and Evaluation, Texas In the Fifth Edition of A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving, Eugene Bardach and new co-author Eric Patashnik draw on more than 40 years of experience teaching students to be effective, accurate, and persuasive policy analysts.
